П

1160mg

L-Arginine Alpha Ketoglutarate (AAKG), Catechins, Anthocyanis, Gallic Acid From Grape Extract Polyphenols, Chlorogenic Acid, Querctin From Apple Extract Polyphenols, Organic Red Spinach Extract (Oxystorm™), Vitamin K2 (Mena Q7™), Vitamin D3.

Other Ingredients: Organic Brown Rice, Plant Derived Capsule (Cellulose), Saffron. No Binders, Fillers, or Preservatives

Contains NO Sugar, Salt, Yeast, Wheat, Gluten, Corn, MSG, Soy, GMO Products, Artificial Coloring, Artificial Flavoring, or Preservatives

* Daily Value Not Established

Iaso® Nitro

Iaso® Nitro is an L-arginine Alpha Ketoglutarate (AAKG) complex that contains 95% polyphenols and is clinically validated to support the nitric oxide synthesis vital to muscular development. AAKG provides the purest form of the amino acid, L-arginine. TLC's unique formula also includes Mena Q7® (vitamin K2) as well as Oxystorm TM , a standardized nitrate that promotes metabolic health.

L-arginine is renowned for its capabilities to improve athletic performance and increase body strength. This amino acid is also believed to counter the symptoms of the common cold and strengthen the immune system.

Take two capsules of Iaso[®] Nitro per day. For optimal results, take Iaso® Nitro before physical exertion and as part of a consistent exercise regimen.

Active Ingredients

L-Arginine Alpha Ketoglutarate

L-Arginine AAKG is a pure-form branch of the amino acid, L-arginine. Scientific studies indicate AAKG has superior time-release qualities that help to increase blood flow throughout the day. Evidence also shows that L-arginine stimulates protein synthesis which is vital to the development of lean muscle mass.

MenaQ7® (Vitamin K2)

MenaQ7® is the only clinically-validated form of vitamin K2 currently available in the market. This complex provides the most bioavailable and longest-lasting form of vitamin K2.

Oxystorm™(Organic Red Spinach Extract)

OxyStorm $^{\text{TM}}$ is a standardized nitrate derived from organic red spinach. Red spinach contains more than five times the amount of nitrate found in beetroot powder and more than fifty times the nitrate provided by beet juice.

ViNitrox™

ViNitrox is a proprietary, synergistic blend of grape and apple polyphenols. This combination of polyphenols is designed to boost physical energy and athletic performance.

Vitamin D3

Vitamin D3's benefits can be both preventative and reparative in nature. This supplement is commonly used to fight off colds and alleviate the symptoms of flu-like ailments as well as promote good bone health.

Catechins

Catechins are a type of antioxidant found in the leaves of plants. Several forms exist, but all are believed to provide potent antioxidants that may help protect the body from the effects of free radicals.

Organic Brown Rice

Brown rice is one of the healthiest and most-studied types of rice. It is a good source of magnesium, phosphorus, selenium, thiamin, niacin, vitamin B6, and manganese.

Saffron

Saffron provides plant-derived chemical components that are believed to aid the body in broad-spectrum disease prevention. The active components found within saffron may also help to counter depression and the stress of dieting.

Iaso[®] Nitro is a GMP-certified product made in the USA. (The Good Manufacturing Practice helps to ensure products are produced according to consistent quality standards.) Iaso[®] Nitro contains no artificial flavoring, coloring, sugar, or salt. It is gluten-free and contains no yeast, wheat, corn, or soy products.
