

Nitro

A NATURAL DIETARY SUPPLEMENT TO SUPPORT NITRIC OXIDE PRODUCTION AND HEALTHY CIRCULATION.

STORE IN A COOL, DRY PLACE.

TAKE IT

Prior to activity

DOSE

As a dietary supplement, take two or four pills per day.

Reach peak performance with three supplements—Nitro style

Nitro is ready to take you to your highest levels of strength, health, and athletic performance. Our unique formula combines the best L-arginine complex with MenaQ7® and OxyStorm™—the go-to winners for vitamin K2 and nitrate supplements.

Nitro is designed to support nitric oxide production, healthy circulation, and antioxidant levels. Each serving contains 95% polyphenols to support efficient nitric oxide synthesis for healthy cardiovascular functions, vasodilation, and blood flow. 2 capsules are the equivalent of consuming 2.2 pounds of fresh fruit.*

Active Ingredients:

Proprietary Blend (L-Arginine)

This amino acid is a “building block” of protein. It stimulates the release of human growth hormones and other substances in the body. This, in turn, can promote strength and endurance when used as part of regular and sustained physical activity routine. It is converted in the body into a free radical chemical called nitric oxide. L-Arginine also promotes the stimulation of nitric oxide which helps to support blood flow, vascular and intramuscular circulation.

Proprietary Blend (Alpha Ketoglutarate (AAKG))

AAKG, commonly known as arginine alpha ketoglutarate, contains the essential amino acid, L-arginine. Human biochemistry depends on arginine to perform various important functions. Arginine serves to promote healthy functioning of the immune system. It is also known to be a key player in protein synthesis. Alpha ketoglutarate is vitally important for the efficient metabolism of certain amino acids, as well as for accommodating the production of energy.

Proprietary Blend (Catechins)

Catechins belong to a division of phytonutrients called flavanols. Catechins act as antioxidants in the body, with the potential to combat a number of health conditions and diseases. Some of the largest concentrations of catechins per serving occur in fresh fruits.

Proprietary Blend (Anthocyanins)

Anthocyanins are a type of flavonoid, a class of compounds with antioxidant effects. Found naturally in a number of foods, anthocyanins are the pigments that give red, purple, and blue plants their rich coloring. Anthocyanins also offer anti-inflammatory, anti-viral, and anti-cancer benefits. In herbal medicine, anthocyanin-rich substances have long been used to treat a number of conditions.

Proprietary Blend (Gallic Acid from Grape Extract Polyphenols)

Grape seed extract is high in antioxidants in the form of polyphenols, which contribute to its potential therapeutic action. Resveratrol, the grape's greatest claim to fame, is found primarily in the skins of grapes,

with gallic acid, catechin, and epicatechin being the main polyphenols found in Grape seed extract. Studies have shown that some of the compounds sourced from grapes, such as catechin and epicatechin, have a synergistic antioxidant effect.

Proprietary Blend (Chlorogenic Acid)

Chlorogenic acid is the primary polyphenol in coffee, and research links it to several exciting health benefits. The benefits of chlorogenic acid include better glucose and insulin regulation, decreased blood pressure, and improved cardiovascular function. Taken as a dietary supplement, chlorogenic acid slightly reduces blood pressure, and can also have anti-inflammatory effects.

Proprietary Blend (Quercetin from Apple Extract Polyphenols)

Quercetin is a type of flavonoid that is commonly heard of when talking about apple polyphenols. Quercetin, much like ellagic acid, also provides protection against cancer. Both protect against disease and DNA damage. Quercetin also has anti-inflammatory capabilities. Apple polyphenol extracts contain many different types of polyphenols and antioxidants that benefit the body.

Proprietary Blend (Organic Red Spinach Extract (Oxystorm™))

OxyStorm™ is a standardized nitrate derived from organic red spinach. Red spinach, one of the richest sources of nitrate in nature, contains more than five times the amount of nitrate found in beetroot powder and more than fifty times the nitrate provided by beet juice.

Proprietary Blend (Vitamin K2 (Mena Q7™))

MenaQ7® is the only clinically-validated form of vitamin K2 currently available in the market. This complex provides the most bioavailable and longest-lasting form of vitamin K2. Vitamin K activates proteins that play a role in blood clotting, calcium metabolism and heart health.

Proprietary Blend (Vitamin D3)

Vitamin D3 is one of the two forms of vitamin D, which is one of the most important vitamins for overall bodily functions. The best benefits of this vitamin include improved bone density and brain health, strengthened immune system, weight loss, and a lower occurrence of autoimmune diseases.

Supplement Facts

Serving size 2 Capsule Servings Per Container 30		
	Amount Per Serving	% Daily Value*
Exclusive Proprietary Blend	1160mg	**
L-Arginine Alpha Ketoglutarate (AAKG), Catechins, Anthocyanin, Gallic Acid From Grape Extract Polyphenols, Chlorogenic Acid, Quercetin From Apple Extract Polyphenols, Organic Red Spinach Extract (Oxystorm™), Vitamin K2 (Mena Q7™), D3.		
Other Ingredients: Organic Brown Rice, Plant Derived Capsule (Cellulose), Saffron. No Binders, Fillers, or Preservatives.		
Contains NO Sugar, Salt, Yeast, Wheat, Gluten, Corn, MSG, Soy, GMO Products, Artificial Coloring, Artificial Flavoring, or Preservatives.
