## Healthy Smile, Healthy Weight, Healthier You!

Enjoy the weight loss benefits of the new SlimPaste! Get everything you have ever wanted in a toothpaste, right here.

Our SlimPaste is made with peppermint, ginger, and cinnamon that not only freshens your breath, but also helps curb your appetite and suppresses your cravings! Other beneficial ingredients include coconut oil and other mineral-rich components to help reduce plaque, harmful bacteria and tooth decay.

Glycerin and Fluoride Free

### Active Ingredients:

#### Organic Coconut oil

Coconut oil, or copra oil, is an edible oil extracted from the kernel or meat of mature coconuts harvested from the coconut palm. It is high in lauric acid, which has been known to kill harmful bacteria, fungi, and viruses in the body. The lauric acid in coconut oil attacks harmful bacteria in the mouth that can cause bad breath, tooth decay, and gum disease.

#### Sea Salt

Sea salt is salt that is produced by the evaporation of seawater. Calcium, magnesium, silicon, phosphorus, sodium, nickel and iron are just a few of many trace elements and minerals found in sea salt. These nutrients strengthen gums and protect against tarter and bad breath. High in iodine, sea salt has antibacterial properties and helps neutralize acids in the mouth.

#### Bentonite Clay

Calcium bentonite clay is an absorbent kind of clay that typically forms after volcanic ash ages. This clay has a unique composition and can absorb "negatively charged" toxins. Bentonite clay is known to have antibacterial properties and binds to unhealthy substances in the mouth, such as around the teeth and on the tongue and gums, and helps to remove them before you swallow them and become sick.

#### Organic Peppermint essential oil

Peppermint oil is derived from the peppermint plant. A cross between water mint and spearmint, it aids with a variety of health conditions and also freshens breath. Peppermint essential oil impacts the part of the hypothalamus that controls feelings of satiety, encouraging the release of hormones that suppress appetite, especially leptin while suppressing the release of the hunger hormone, ghrelin.

#### Stevioside powder

Stevioside, a compound extracted from stevia leaves, is a sweetener that stands out among the natural sweeteners. This extract is a white powder composed of stevioside and its anomers, the rebaudiosides, which are responsible for the sweetness of the compound. In addition to its sweetening property, various studies have linked stevioside to beneficial health properties, such as being a source of vitamins, minerals, anti-oxidants, and antimicrobial properties.

#### Organic Green Tea

Green tea is a type of tea that is made from *Camellia sinensis* leaves and buds that have not undergone the same withering and oxidation process used to make oolong teas and black teas. It is loaded with antioxidants and nutrients that have powerful effects on the body. Green tea has been shown to boost the metabolic rate and increase fat burning.

#### Organic Cinnamon Leaf essential oil

Cinnamon leaf oil comes from *Cinnamomum verum* from the Laurel (*Lauraceae*) plant family. The oil extracted from cinnamon leaves contain phenols and many beneficial components. An excellent fragrance and flavoring agent, Cinnamon is an excellent essential oil for controlling appetite because it helps maintain healthy blood glucose levels, which play an important role in feelings of hunger. It is effective because it contains cinnamaldehyde, a compound that makes the body's cells more receptive to insulin, so they are more likely to take in glucose for energy, reducing its levels in the blood. When blood sugar levels are under control, cravings for sugar are also reduced.

#### Organic Ginger essential oil

Ginger oil comes from ginger root (*Zingiber officinale*), a pungent, peculiar-looking underground rhizome. Ginger essential oil has warming and soothing properties that make it useful in everyday life. Ginger oil's many benefits are attributed to its anti-inflammatory, diaphoretic, expectorant, antiseptic, carminative, analgesic and stimulating properties. Ginger also helps reduce food cravings by controlling inflammation, which plays a role in digestion and the absorption of nutrients. Ginger oil also helps burn fat and boost metabolism.

#### Sodium Bicarbonate

Sodium bicarbonate is the monosodium salt of carbonic acid with alkalizing and electrolyte replacement properties. Sodium bicarbonate is also known as baking soda, bread soda, bicarbonate of soda and cooking soda.

Toothpaste containing baking soda seems to remove plaque more effectively than toothpaste without it.

#### **Zinc Oxide**

Zinc oxide is made from zinc, a type of metallic element found in nature. It can help freshen breath by reducing the impact of odorous compounds produced in our mouth by bacteria, and also aids with tartar build-up.

#### **Xanthan Gum**

Xanthan gum is a polysaccharide used as a common food additive. It is an effective thickening agent and stabilizer to prevent ingredients from separating.

### **Best Used With:**

**ProZ** is a two capsule combination of all-natural probiotic, prebiotic, and enzyme blend combined with a formula designed to help you naturally and effortlessly relax from your day, fall asleep faster, sleep more soundly, and feel great in the morning.\*

**Resolution Drops** dietary supplement suppresses appetite and offers aggressive weight loss. \*

**NutraBurst\*\*+** liquid multivitamin dietary supplement replenishes vital nutrients and minerals. \*
